

The Future of Interoperable Communications in Wisconsin

Discuss the Policy, Budget and Operational Impact of Wisconsin's Statewide Public Safety Communications Plan

Madison

July 26

Milwaukee/Waukesha

July 27

Appleton

August 3

Eau Claire

August 10

Pre-meetings will be held the evening prior to each scheduled date to accommodate volunteer response agencies

This series of statewide meetings will focus on the local policy and operational impact of state communications plans and proposed Standard Operating Procedures. Police and fire chiefs, sheriffs, emergency management directors, EMS directors, and regional 911 center directors, and senior leaders of state government are strongly encouraged to attend.

Sessions during the 1-day program will focus on:

- Effect of interoperable communications on local policy, operations and budget
- State Interoperability Executive Council's efforts to improve interoperable communications in Wisconsin
- Non-technical discussion of Wisconsin Public Safety Communications Plan
- Feedback on draft state Standard Operating Procedures for interoperability

For more information, please visit the State Interoperability Executive Council's website, www.SIEC.wi.gov or call David Spenner at 608-261-7535.

Registration information will be sent electronically and be available online.
