*Applicant Type - County, Nation, City, Town, or Village

Ratio must be equal to or greater than **$3.78 per capita in order to qualify for WDF.

Determining Eligibility for the WDF Program

State assistance is necessary to supplement the efforts and available resources of the county and local governments and Federal disaster assistance is not available.

The public assistance damages incurred by any one unit of local government meet the county per capita thresholds annually established by FEMA for the Public Assistance Program. The WDF program allows for the applicant to use Categories A through G to meet the per capita threshold, but only Categories A, B and C are eligible categories for reimbursement.

A disaster or emergency declaration was issued by the local or tribal governmental unit or the state for the incident.
