Introduction

The Wisconsin Disaster Fund (WDF) was created by 2005 Wisconsin Act 269 and was enacted April 5, 2006. Wisconsin Emergency Management (WEM) was designated as the agency responsible for administrating the fund and subsequently developed an Wisconsin Administrative Rule, WEM 7, for this purpose.

WDF is a state-funded program designed to reimburse local governmental units – hereafter referred to as “the Applicant” – for costs imposed by a disaster event when Federal Emergency Management Agency (FEMA) Public Assistance funding is not available. The State reimburses 70% of eligible costs while the Applicant is responsible for the remaining 30%. The fund reimburses three categories of work: debris clearance, protective measures (such as sandbagging against floodwater), and repairs made to roads and bridges that were damaged by a disaster. For more information on how to separate the categories of work, refer to this link: https://dma.wi.gov/DMA/divisions/wem/recovery/docs/Public_Assistance_Categories_of_Work_Fact_Sheet.pdf.

WDF is modeled after FEMA’s Public Assistance Program and is also guided by the Robert T. Stafford Disaster Relief and Emergency Assistance Act. However, it is more limited in scope. Therefore, the fund does not cover losses suffered by individuals, businesses, or the agricultural sector. The Public Assistance Program and Policy Guide (PAPPG) is also referenced during the review of the application documentation².

This handbook was prepared by WEM and contains the required administrative procedures, references, and guidance that will assist in the application process for WDF reimbursement. It is important to remember that WDF is a reimbursement program based on eligible, documented costs that were imposed by a disaster event. Accurate records are essential in documenting the costs of disaster recovery and are necessary to support a WDF claim. No funds will be disbursed until required documentation is provided to WEM-WDF.

---

² The current version of the PAPPG can be found by visiting: https://www.fema.gov/media-library/assets/documents/111781.
Eligibility Criteria
The Applicant must meet all of the following criteria to be eligible to receive the WDF:

1. “Applicant” means a local governmental unit\(^2\), which includes counties, cities, villages, towns, and federally recognized tribal governments.
2. The local governmental unit suffered a disaster and applies for disaster assistance funding.
3. A disaster or emergency declaration was issued by the local governmental unit or the state during the incident period of the disaster.
4. The local governmental unit incurred disaster costs that are equal to or exceed $3.78\(^3\) per capita\(^4\). For example, a town of 2,000 residents would have to incur $7,560.00 or more in damages (2,000 x 3.78).
5. Federal disaster assistance is not available to the Applicant because either:
   a. The state did not meet eligibility thresholds for federal assistance\(^5\), or
   b. The state did achieve eligibility, but the local governmental unit does not reside within a federally declared county\(^6\).

---

\(^2\) A local governmental unit is defined under WI Chapter 19.42(7u) as: “a political subdivision of this state, a special purpose district in this state, an instrumentality or corporation of such a political subdivision or special purpose district, a combination or subunit of any of the foregoing or an instrumentality of the state and any of the foregoing.”

\(^3\) The per capita rate which is determined by FEMA is updated every October 1\(^st\) for the following year.

\(^4\) The 2010 census is used to determine a local governmental unit’s population.

\(^5\) The state is deemed eligible for FEMA assistance if there is $1.50 in documented damages per capita on a statewide basis.

\(^6\) If the state receives FEMA assistance, specific counties will be deemed eligible for federal assistance by demonstrating $3.78 in damages per capita on a countywide basis; these federally declared counties serve as FEMA assistance boundaries. A local governmental unit is not eligible for WDF if it resides within a federally declared county.
Application Process

The application process involves two county documents: The Uniform Disaster Situation Report (UDSR) and the County Notification to WEM of Eligible Applicants for Wisconsin Disaster Fund, also known as the County Notification Form. Subsequently, Applicants submit the Local Applicant Request for State Public Assistance and the Local Documentation ToolKit, which is a WEM-developed excel document. Upon receiving a completed application package from an Applicant, the WDF Coordinator will evaluate the submitted materials to ensure claims are eligible for reimbursement and properly documented. When the application is deemed complete from within WEM, the WDF Coordinator will send approval documents to the Applicant and request reimbursement for the Applicant in the form of a check.

County Responsibility

Within 24 hours of the event, the County Emergency Management (EM) Director submits a UDSR. Only one UDSR should be submitted for the entire county. Therefore, individual UDSRs will not be submitted for each Applicant. Revised editions of the UDSR should be made as necessary to reflect situational changes.

Within 30 days of the beginning event, the County EM submits a County Notification Form, which lists potential Applicants (jurisdictions that plan on completing a WDF application), their damage estimates, and their population totals to determine whether each Applicant meets the eligibility threshold of $3.78 in damages per capita. Only one County Notification form needs to be submitted for the entire county. Therefore, individual County Notification forms will not be submitted for each Applicant.

The County EM Director should direct Applicants to the WEM-WDF webpage where Applicants can obtain application materials and view a “how to” video on application completion to ensure accuracy of the application on the first submission. Applicants should establish contact with the WDF Coordinator early to facilitate the application process.

If submitted application materials are not developed and organized according to the “how to” video, the application materials will be returned to the Applicant, and they will be encouraged to consult with the WDF Coordinator before resubmitting the application package.

Note: If there has been damage to roads, contact should be made as soon as possible with the Wisconsin Department of Transportation (WI-DOT)’s Disaster Damage Aids (DDA) program personnel (https://wisconsindot.gov/Pages/doing-bus/local-gov/astnace-pgms/highway/disaster.aspx). The County Highway Commissioner often acts as a liaison between the local Applicant and the DDA program. County EMs should inform Applicants of both the WDF and DDA programs and encourage them to pursue the best available option.

---

7 DDA has a better cost-sharing rates compared to WDF. Also, DDA allows for mitigation and/or improvements whereas WDF only allows roads to be restored to pre-disaster condition.
**Applicant Responsibility**

Within 60 days of the event, the local jurisdiction must submit the Applicant Request for State Assistance, which allows the Applicant to communicate damage cost claims along each category of work to the WDF Office. The form requires the signature of the local government’s Chief Elected Official and certifies the jurisdiction’s status as an active Applicant.

Potential Applicants that are listed on the County Notification Form have 60 days after the disaster event to submit an Applicant Request for State Public Assistance. If an Applicant fails to meet the 60-day deadline, the WDF Coordinator will provide a final written notice to the County EM and the potential Applicant if the Applicant does not complete the Request for State Public Assistance, the Applicant will not be eligible for WDF funds regarding that specific disaster event and will be removed from all WDF tracking documents.\(^8\)

Within 90 days of the event, all recovery work should be completed, and the applicant materials should have been submitted to the WEM-WDF program for review. Applicant materials include:

- Declaration of Disaster/Emergency by the local jurisdiction or county and signed by the appropriate official(s).
- Local Documentation ToolKit to identify the costs being claimed, submitted as an electronic version.
- All supporting documentation listed on the ToolKit including:
  - Labor Claims: Timesheets or Timecards AND proof of payment (including fringe benefits, if claimed).
  - Equipment Usage Claims: Official equipment log/dispatch records OR timesheets that validate a specific employee (operator) used the equipment for the hours claimed.
  - Material Claims: Invoices AND proof of payment (i.e. cancelled checks, check stubs, etc.)
  - Contractor Work Claims: Invoices AND proof of payment (i.e. cancelled checks, check stubs, etc.)
  - Volunteer Labor Claims: Sign-in sheets that provide the date, volunteer’s name, hours volunteered, location of work, and description of work performed.
  - Volunteer Equipment Usage Claims: Official equipment log/dispatch records OR timesheets that demonstrate usage OR volunteer sign-in sheets if volunteer labor who operated the equipment.

Applicants can submit documents to WEM-WDF through the County EM or directly to the WDF Coordinator. At all times, the County EM should be aware of the status of the Applicants within their county. This is typically accomplished by including the relevant County EM in all email correspondence with the Applicant.

---

\(^8\) It is often the case that potential Applicants listed on the County Notification never come to fruition. The 60-day deadline is an accountability procedure to ensure WDF tracking documents accurately reflect demand on the fund.
Vetting, Approval and Payment Phases
The WDF Coordinator will respond within 45 days of receiving the Applicant-completed materials to either request more documentation from the Applicant or determine that the application is complete.

An Applicant has 45 days to fully respond to any request from the WDF Coordinator or their application may be denied.

When the application is deemed complete by the WDF Coordinator, the WDF Coordinator email documents to the Applicant. The following documents included in that email require the Chief Elected Official’s signature:

- DMA Form 1017 – Wisconsin Disaster Fund Public Assistance Form
- DMA Form 1017A – Assurance of Construction
- DMA Form P4 – Project Completion Form

The signed documents must be returned, either electronically or by mail, to the WDF Office within 30 days of the Applicant receiving them or funding may be withdrawn.

Upon receipt of the signed documents, the WDF Coordinator requests a reimbursement check which is sent to the County EM Director for the County EM director to distribute to the Applicant.9

The Applicant must keep all documentation in accordance with WEM 7.06(3).

Time Extensions
Within 90 days of the event, all recovery work should be completed, and the application materials should have been submitted to the WEM-WDF program for review. If unforeseen or extenuating circumstances10 prevent the Applicant from meeting the 90-day deadline, the Applicant must submit an extension request form and explain why recovery work could not be completed within 90 days of the disaster. The WDF Coordinator will review the request and the proposed completion date of the pending work. If the request is approved, time extensions will be granted based on the circumstance, when such circumstances are expected to subside, and the amount of recovery work still pending. More than one extension may be submitted and granted depending on the situation.

---

9 The check is sent to the County EM office because the address of the County EM office is known and verified. However, if a County EM wants a check sent directly to the Applicant, the County EM shall validate the Applicant’s mailing address during the approval documents phase, inform the WDF Coordinator of the validated address, and email a request to the WDF Office that the check be sent directly to the Applicant.

10 Extensions are typically provided when a disaster imposes so much damage on a region that materials and/or contractors are unavailable in the near future. Additionally, projects may be granted an extension for seasonal changes.
Appeal Process
An Applicant may appeal a denial of funds decision made by the WDF program under the procedures in WEM 7.09. An Applicant must submit its first appeal to the Division of Emergency Management Administrator within 30 days after the determination that the Applicant will not receive the WDF. This appeal must be in writing and should include the rationale for overturning the original determination. If applicable, the appeal should also include any outstanding documentation that was described in the original determination. After the first appeal, an Applicant may submit a written request for a problem resolution process. If the Applicant exhausts the Department of Military Affairs appeal process, the Applicant may request an administrative hearing under Wisconsin Statues Ch. 227.

Eligible and Ineligible Costs
To be eligible for WDF, costs must be the direct result of the declared disaster event, have occurred during the designated incident period, and be the legal responsibility of an eligible Applicant at the time of the disaster. Eligible costs also must fall within the three following categories of work: Debris Removal (Category A), Emergency Protective Measures (Category B), and Road and Bridge Repair (Category C). Category A and B work is considered Emergency Work while Category C work is considered Permanent Work. For more information on how to separate the categories of work see below or refer to the following link; https://dma.wi.gov/DMA/divisions/wem/recovery/docs/Public_Assistance_Categories_of_Work_Fact_Sheet.pdf.

Eligible Costs

- **Category A – Debris Clearance** to include woody debris, stump grinding, dirt to fill stump holes, building wreckage, word to clear public roads, and debris placed on roadside for pickup.

- **Category B – Emergency Protective Measures** to eliminate or reduce immediate threats to life, public health or safety, or a hazard that threatens significant damage to improved public or private property. Most often these measures include sandbagging for water control or road closure services.

- **Category C – Roads and Bridges** to include surfaces, bases, shoulders, ditches, drainage structures, piers, girders, abutments, slope protection and approaches. Roads are eligible for repair if they do not receive federal funds for maintenance. Roads that do not receive federal funds for maintenance are typically rural major roads, rural minor roads, and rural local roads. See the Wisconsin DOT webpage on Functional Classification to determine road classification by county.

Roads that do not receive federal funds for maintenance are typically rural major roads, rural minor roads, and rural local roads. See the Wisconsin DOT webpage on Functional Classification to determine road classification by county.

- **Private roads, including homeowners’ association roads, are not eligible for this program** (https://wisconsindot.gov/Pages/projects/data-plan/plan-res/function.aspx). Roads damage that resulted from debris removal or other emergency work, i.e. heavy machinery operating on roadways to clear debris, may be reimbursable if the damage was based on the necessity to use the road for debris removal or other emergency work.

---

11 The only permanent work costs eligible under WDF are Road and Bridge work. Therefore, other buildings and infrastructure, such as public libraries or public utility infrastructure, are ineligible for permanent work cost reimbursement through the WDF. (see “Ineligible Costs” on the next page for more clarification.)

12 Road damage that resulted from debris removal or other emergency work, i.e. heavy machinery operating on roadways to clear debris, may be reimbursable if the damage was based on the necessity to use the road for debris removal or other emergency work.
owned by a tribal government may be eligible for the WDF even if the roads are not open to the general public.

- Mitigation and/or improvement work on roads and bridges is not eligible for reimbursement under WDF. Roads must be restored to pre-disaster condition only.

Ineligible Costs

- Damage to water control facilities including dams, reservoirs, levees, drainage channels, shore protective devices, irrigation facilities and pumping facilities
- Damage to buildings and equipment
- Damage to utilities including power generation facilities, sewage collection systems and water treatment plants
- Lodging and travel expenses
- Ordinary operating expenses of local governmental units, such as salaries and expenses of public elected officials, which are not directly related to the disaster and not part of their required duties.
- Administrative overhead costs associated with disaster response and recovery, including the time to gather and submit the application documents
- Costs for which payment has been, or will be, received from any other funding source
- Disaster-related costs which should be covered and compensated by insurance
- Applications totaling less than $500.00
- Mitigation and/or improvement projects
- Assistance provided under written or verbal mutual aid agreements
- Costs associated with snow removal
- Interest incurred on loans for disaster recovery work

---

13 In some circumstances, emergency work (Category A - Debris Clearance and Category B - Emergency Protective Measures) performed on utility infrastructure and water control facilities is reimbursable if the utility is (1) owned and operated by the local governmental unit, and (2) if the local governmental unit can document the costs of performing emergency work. Under such circumstances, the costs of emergency work would be claimed on the local jurisdiction’s WDF application and could only be claimed if they were performed within 72-hours of the disaster event. Examples of emergency work on utility infrastructure and water control facilities include Emergency Protective Measures against downed wires and emergency pump services to prevent wastewater from entering public spaces. However, WDF does not reimburse for permanent work on Utilities (Category F of Public Assistance Program Categories of work), which makes reconstructing utility infrastructure ineligible work to receive WDF funding for.

14 Guiding Principle: WDF funds are only available if a disaster event imposed additional costs on a local governmental unit. Because mutual aid agreements are based on the neighbor-helping-neighbor concept without billing procedures, mutual aid does not impose additional costs on the affected jurisdiction applying to WDF. Therefore, there is no cost to claim.
Work Performed by Fire Departments/Districts

Guiding Principle: WDF funds are only available if a disaster event imposed additional costs on a local governmental unit. If an established contract between a fire department/district and municipality covers disaster activities without imposing additional costs on a municipality, then WDF funds will not be available because additional billing beyond the contract was not necessary. In contrast, if the fire department/district operates on a pay-per-call basis, or if the fire department/district provided services not covered under contract, the amount billed to the Applicant for disaster work is reimbursable under WDF as long as it is eligible work. Please contact the WDF Coordinator with questions regarding fire departments/districts as this document does not cover every plausible circumstance.

Supporting Documentation Requirements

The Local Applicant Documentation Toolkit must be completed and submitted to the WDF Coordinator with all supporting documentation. Costs are claimed in four categories: Labor costs, Equipment Usage costs, Material costs, and Contract Work costs. All costs should be submitted in one Toolkit for the Applicant. The following supporting documentation must be submitted with the Toolkit to support costs claimed. This supporting documentation should be submitted as an editable excel file so it can be used during the review of the application.

Labor Costs

- Labor costs include actual wages paid plus fringe benefits, if applicable.
- Legible time cards/sheets must be submitted that show the dates(s) and hours worked per employee.
- Proof of payment (i.e. cancelled check, check stub, payroll information, etc.) must be submitted to validate hourly wage, overtime pay and/or fringe benefits for the time period claimed for each employee.

Categories A & B (Emergency Work)

Only overtime is reimbursable in Categories A and B for full-time and/or part-time employees\textsuperscript{15}. However, regular and overtime pay is eligible for reimbursement for non-budgeted employees (temporary hires) that are tasked to perform Category A and/or B work in response to a disaster\textsuperscript{16}. If a part-time worker is called in beyond their regularly scheduled hours, this work may be considered overtime and therefore eligible for reimbursement\textsuperscript{17}. However, documentation must be provided establishing how many hours the part-time employee worked per week prior to the event.

\textsuperscript{15} Regular time is not reimbursed as the jurisdiction would have compensated force account employees (budgeted employees) for this time regardless of the disaster event.

\textsuperscript{16} In this instance, temporary hires are non-budgeted employees who are brought on at an additional expense to the local governmental unit to help with emergency response efforts such as Debris Clearance.

\textsuperscript{17} For example, if it can be established that a part-time employee works 20 hours per week but was called in for 10 overtime hours to perform debris removal, then the additional 10 hours can be claimed as reimbursable overtime pay.
The value of compensatory time may be eligible for WDF reimbursement if the Applicant can provide a written policy which details employee eligibility and payment procedures. Standby labor costs are not eligible.

**Category C (Permanent Work)**
For permanent work on roads and bridges (Category C) work, both regular time and overtime work is eligible for reimbursement for all employees regardless of their status as a part-time, full-time, or temporary hire employee.

No elected official can benefit from his/her position within a local governmental unit under the code of ethics. Therefore, WDF cannot reimburse an Applicant for the cost of any elected official’s labor. The costs for an elected official's labor include per diem, mileage for meetings, and administrative costs. If disaster assistance or road work is not part of the elected official’s required duties, the Applicant must submit documentation to support a claim for that official's labor costs (i.e. contract, agreement, etc.).

**Equipment Usage Costs**
All equipment usage costs are eligible for reimbursement, regardless of the employee's status while operating the equipment, as long as the equipment was used to perform work within one of the eligible categories. Standby equipment costs are not eligible for reimbursement, even if the equipment is rented but not used.

Equipment use can be validated through either:

- An equipment log, or dispatch record that includes a description of the equipment and the hours it was used, or
- Timesheets/cards that validate an operator (employee) was on the job and operating the equipment for the stated amount of time on a specific date.

Equipment usage reimbursement is determined by an hourly rate established in the Wisconsin DOT Highway Maintenance Manual. If the Wisconsin DOT schedule of rates does not include the equipment in question, the FEMA Schedule of Equipment Rates will be used to determine an hourly rate (this is most common for chainsaws). Equipment rates in both the state and federal documents include depreciation, maintenance, fuel, lubricants, and other costs incidental to operations. Therefore, WDF does not reimburse incidental costs such as fuel.

If the Applicant uses equipment that does not have an established rate in the WI DOT and FEMA schedules of rates, any submitted rate must include documentation that shows each component of the rate is comparable to current market rates. The suggested rate cannot be based on rental rates as rental rates include profit calculations that go beyond operational and maintenance costs for budgeted equipment. However, an Applicant's costs for renting equipment can be reimbursed if the rented equipment

---

18 Ensure the most recent document is accessed as the current rates and archived rates are stored on the WI DOT site. For the most recent document, refer to Chapter 02 (Administration), Section 25 (Cost Invoicing), Subject 50 (Classified Equipment Rates). [https://wisconsindot.gov/Pages/doing-bus/local-gov/hwy-mnt/mntc-manual/chapter02.aspx](https://wisconsindot.gov/Pages/doing-bus/local-gov/hwy-mnt/mntc-manual/chapter02.aspx)

19 Refer to the following webpages for the FEMA Schedule of Equipment Rates, [https://www.fema.gov/schedule-equipment-rates](https://www.fema.gov/schedule-equipment-rates)
equipment was used to perform eligible work. For example, an Applicant may be reimbursed if a rented chainsaw was used to perform debris removal.

Automobile and truck usage is reimbursed on a mileage basis. For reimbursement, a vehicle must have been actively performing Category A, B, and/or C work. Miles used on routine patrolling, checking on sites, distribution of water, and welfare checks on workers are not eligible for reimbursement. To be reimbursed, an Applicant must keep accurate records to document mileage used performing eligible work. For example, miles used by a truck to haul away downed trees would be eligible for mileage reimbursement under Debris Clearance (Category A). Where vehicles were used in a mostly stationary manner, such as road closure services, hourly reimbursement rates can be used.

Elected officials can claim equipment costs:

- If the elected official is seeking reimbursement for town-owned equipment, then the costs would go in the Equipment Tab and a timesheet must be included to verify the amount of time the equipment was used for.
- If the elected official is seeking reimbursement for self-owned equipment and the jurisdiction is being billed for the equipment usage, then the costs would go in the Contract Work Tab.
- If the elected official is seeking reimbursement for self-owned equipment and the jurisdiction is not being billed for the equipment usage, then the costs would go in the Volunteer Equipment Tab.

Material Costs
Materials purchased for disaster response and recovery are eligible for reimbursement if the Applicant provides an invoice showing quantities and cost of the materials, and the Applicant provides proof of payment in the form of cancelled checks. Eligible materials include, but are not limited to: culverts, gravel, other aggregate for road repair, as well as sand and bags for water control operations (typically, only materials used for road repair are eligible for reimbursement). Material costs for items such as gloves, rakes, chainsaws, tables, and cones are not eligible for reimbursement. If materials are used from a municipal stockpile, a log showing the quantity of materials used and invoices that document cost per unit for those must be provided for an Applicant to receive reimbursement. Additionally, food costs for emergency workers are eligible for reimbursement only if those food costs occur within the first 72 hours of the event and are for reasonable amounts.

Contract Work Costs
For an Applicant to receive reimbursement for Contract Work costs, it must provide, for all persons and/or companies hired as contractors, an invoice on company letterhead detailing date(s), hour(s), and location(s) worked. The Applicant must submit proof of payment with each invoice and can be submitted as cancelled checks, check stubs, or other forms of payment. Very few projects claimed under WDF are large enough to warrant bidding procedures but needed guidance on bidding procedures can be found through local or county highway departments, public works departments, or the regional DNR or DOT office if needed.
Volunteer Labor and Equipment Costs

The value of volunteer labor and equipment is used to offset the 30% local share, it does not add costs to the WDF reimbursement claim. An example of volunteer labor is volunteer fire departments and residents who perform eligible work under Categories A, B, and/or C but who are not compensated for their time. The value is volunteer labor is calculated based on the federal minimum wage, $7.25 per hour. For volunteer labor to qualify so an Applicant can use its value to offset the local share, the Applicant must have a sign-in sheet that documents the date, each volunteer’s name, total time worked, work performed, and the location of work.

Additionally, the value of volunteer equipment can be calculated based on rates provided on the Wisconsin DOT and FEMA schedules of rates. Refer to the Equipment Usage costs section for more information about equipment costs. The amount of volunteer equipment usage can be validated through:

- An equipment log, or dispatch record that includes a description of the equipment and the hours that it was used for,
- Timesheets/cards that validate an operator (volunteer) was on the job and operating the equipment for the stated amount of time on a specific date, or
- A volunteer labor sign-in sheet that describes the type of work a volunteer operator performed by location, date, and the total usage time of the equipment.

*Applicant Type - County, Nation, City, Town, or Village  
**Ratio must be equal to or greater than $3.78 per capita in order to qualify for WDF.

State assistance is necessary to supplement the efforts and available resources of the county and local governments and Federal disaster assistance is not available.

The public assistance damages incurred by any one unit of local government meet the county per capita thresholds annually established by FEMA for the Public Assistance Program. The WDF program allows for the applicant to use Categories A through G to meet the per capita threshold, but only Categories A, B and C are eligible categories for reimbursement.

A disaster or emergency declaration was issued by the local or tribal governmental unit or the state for the incident.

Applicants are encouraged to visit the WEM-WDF web page to review the WDF Administrative Plan and watch the instructional “how to” video on submitting an accurate application package.

dma.wi.gov/DMA/wem/grants/recovery-programs#WDF

WDF reimburses 70 percent of eligible costs while the Applicant is responsible for the remaining 30 percent.

Duplicative benefits are not allowed – that is, costs for which payment has been, or will be, received from any other funding source.

WDF Coordinator: 608-242-3259 or widisasterfund@wisconsin.gov

It is understood that the Local Applicant Documentation Toolkit and all supporting documentation will be submitted to the WDF Coordinator within **90 days of the disaster date**. Contact the WDF Office if an extension is needed.

MEMORANDUM

To: [Jurisdiction] of [Jurisdiction], via the [County Name] County EM Director

From: Wisconsin Disaster Fund (WDF) Coordinator

Re: WDF Eligibility Notification for the [Jurisdiction] of [Jurisdiction]

Dear [Jurisdiction] of [Jurisdiction],

This is a notification that the [Jurisdiction] of [Jurisdiction] will be deemed ineligible as a potential WDF Applicant for the disaster event starting on [DATE] unless an Applicant Request for State Public Assistance is submitted to the WDF Office by [60 days from event date].

Potential Applicants, which are listed on the County Notification Forms, have 60 days from the date of the disaster to submit an Applicant Request for State Public Assistance. If an Applicant fails to submit this document by the 60-day deadline, the WDF Coordinator is required, under guidance provided in the WDF Admin Plan, to provide a formal notice in writing to the (potential) Applicant and the County Emergency Management Director explaining that an ineligibility determined will be made should the Applicant fail to submit the Request for State Public Assistance.

This memorandum serves as a notice in writing for the [Jurisdiction] of [Jurisdiction] regarding the [DATE] disaster event. If the Request for State Public Assistance is not received by [60-day deadline], the [Jurisdiction] of [Jurisdiction] will be removed from all WDF tracking documents as a potential Applicant for the [DATE] disaster event. Conversely, if more time is needed to complete the disaster recovery work, the [Jurisdiction] may obtain an extension request form from the WDF Coordinator. The extension request would need to be submitted by [60-day deadline]. Extensions are only provided when unforeseen of extenuating circumstances (i.e. contractor or materials shortages) that can be documented and explained.

If you have any questions or concerns, please contact me, (608) 242-3259 or widisasterfund@wisconsin.gov.

Sincerely,

[WEM-WDF Coordinator Name]
Wisconsin Disaster Fund Coordinator

April 15, 2019  MEMORANDUM

To: [Jurisdiction] of _____, via the _____ County EM Director
From: Wisconsin Disaster Fund (WDF) Coordinator
Re: WDF Eligibility Notification for the [Jurisdiction] of _____

Dear [Jurisdiction] of _____,

There has been a determination made by the Wisconsin Disaster Fund (WDF) Office that the [Jurisdiction] of _____, which was listed on [County Name] County’s Notification form for the [DATE] disaster event, will no longer be eligible for WDF funds for that disaster event.

Potential Applicants, which are listed on County Notification forms, have 60 days from the date of the disaster to submit a Local Applicant Request for State Public Assistance form. If an Applicant has not submitted this document by the 60-day deadline, the WDF Coordinator is required, under guidance provided in the WDF Admin Plan, to provide a formal notice in writing to the (potential) Applicant and the County Emergency Management Director explaining that an ineligible determination is pending should the Applicant fail to submit the Local Request for State Public Assistance.

This process has been followed for the [Jurisdiction] regarding the [DATE] disaster event. Officials from the [Jurisdiction] were provided a formal notice in writing, though the [County Name] County Emergency Management Director, on [DATE OF 60 Day Notice Memo]. The notification Memorandum informed the Applicant of the 60-day deadline and the need to submit the Local Request for State Public Assistance by [60-day deadline]. However, the WDF Office has not received the Local Request for State Public Assistance and no additional information from the [Jurisdiction] has been received. Therefore, the [Jurisdiction] of _____ will be removed from all WDF tracking documents as a potential Applicant for the [DATE] disaster event.

The WDF is administered in accordance with the Disaster Fund Rule, WEM 7. As described in WEM 7.04(3), the local application form along with the supporting documentation for the claim should be submitted within 60 days of the end of the event to be considered eligible for the WDF program.

According to WEM 7.04(5), an application returned to the applicant with a request for more detail information or for correction of deficiencies must be resubmitted within 30 days from receipt by the applicant. The failure of the applicant to provide the requested information in a timely manner without a reasonable explanation may be cause for denial of the application.

The [Jurisdiction] may appeal this determination to the WEM Administrator pursuant to WEM 7.09(1). The appeal must detail in writing the rational for overturning the original determination. The
[Jurisdiction] shall have 30 days after receipt of this determination in which to file a written appeal of denial of funds.

If you have any questions or concerns, please contact me, (608) 242-3259 or widisasterfund@wisconsin.gov.

Sincerely,

[WEM-WDF Coordinator Name]
Wisconsin Disaster Fund Coordinator

WDF Time Extension Request

Applicant Name:
Applicant’s County:
Disaster Event Date:
Date of Request:
Projected Project Completion Date:

Justification for Delay/Extension - Requires information describing extenuating or unusual circumstances, beyond the Applicant’s control, that have resulted in the need for a time extension. List the justification and requested extension for each category of work:

For WEM use only:
Extension Request:    Denied   Approved through
Wisconsin Disaster Fund Coordinator
(print name & signature)   (date)

Comments/Requirements for approval; Explanation for Denial:
Any work not completed by the projected completion date above will be ineligible for WDF funding unless an additional time extension is approved by WEM. All requests for time extensions must be submitted within 90 days of the disaster event.

Revised: December 2018
